

WE ARE DIFFERENT

We are proud to be different: Xpert Service is no big “body-shopping” company and we love it. We build a Club of data integration experts to support our customers, just big enough to fulfil their needs and small enough to keep the relations personal. It gives our services a unique value!

We offer candidates the opportunity to deploy their skills and become one of the best data integrator experts on the market. Either you select Xpert Service to be the place to start your career as data warehouse consultant, or you are already an experienced consultant and Xpert Service will support your growth; you will never regret to work with us.

We are different and proud of it!

Job Title

DATA WAREHOUSE CONSULTANT

Through its data integrator expertise, Xpert Service has become a player on the data warehouse market. We decided to create a Club of (e)xpert professionals willing to challenge their own knowledge every single day and share experiences with their peers and our customers. Xpert Service proposes professional services like design, implementation and support of data warehouse solution but also executive guidance like project goals definition, project management and coaching.

Xpert Service maintains a "People First" culture. We are committed to the belief that creating value for the customers and winning the market's confidence - this through outstanding solutions and services - can only be achieved by giving the highest attention to our people's satisfaction. Xpert Service will always reward members of its Club according to their individual and group performance and commitment.

Job Description

As a data warehouse (DWH) consultant you will participate to the solution design, the development, and the implementation and support of solution(s) at customer location. You will translate customer needs into well founded solutions.

You and your knowledge will warranty the quality of service expected during challenging projects; being an independent mind but also capable of deploying strong social skills.

Our expectation is that you will be committed to your area; willing to learn every single day of the year.

We also expect:

- Knowledge and experience of data warehouse tools like: Informatica PowerCenter, Oracle Business Warehouse, Microsoft, IBM Ascential. Knowledge of Business Intelligence tools such as Cognos, Business Objects or certification is much appreciated
- Knowledge and experience of ETL design, architecture and implementation
- Master degree from high school or university in information technology or bachelor with at least 1 years of experience
- Willing to travel to customer locations
- Service minded
- Effective and pro-active communication towards peers/customer/management
- You to perform, to be ambitious, independent and a team player
- Good control of the Dutch language both orally and written

The Offers

- Excellent salary and secondary labour agreements
- Leasing car, laptop
- Other agreements and compensations
- Warranty of training
- Challenging projects where you'll work with experienced professionals
- You'll be challenged and coached by a peer
- Be part of the Xpert Service Club

Contact

Are you willing to be challenged and grow up to be part of the (E)xpert Club, become an (E)xpert yourself? Dial +32(0)472577611 and contact Olivier Vandelaer or send a mail to OlivierV@xpertservice.com
